

MOUNTREACH SOLUTION

Format-6: Internships Daily Diary (WEEK-5)

Name of the Student: _____

Enrollment Number: _____ Semester: **FIFTH** Academic Year: **2026-27**

Industry Name: **Mountreach Solution Pvt. Ltd.** Domain: **AIML**

Name of Industry Mentor: **Mr. Nikhil Shende**

Task to be assessed: Execution of given project or work to the students, Follow of safety and Maintenance procedures.

Day & Date	Discussion Topics/Activity	Details of Work Allotted Till Next Session /Corrections Suggested/Faculty Remarks	Sign of Industry Mentor
Mon, 22/06/2026	Implemented Python Lists for dynamic data structures. Followed memory maintenance procedures.	Work Allotted: Practice list comprehensions and ensure safe append/remove operations.	
Tue, 23/06/2026	Error and doubts session: Solved list index out of bounds errors and dynamic resizing bugs.	Corrections Suggested: Corrected iteration loops and enforced strict boundary checks for data safety.	
Wed, 24/06/2026	Implemented Tuples for immutable data storage. Ensured data integrity for fixed collections.	Work Allotted: Structure static configuration data using tuples to prevent accidental modification.	
Thu, 25/06/2026	Executed Dictionaries for efficient key-value pair mapping and fast data retrieval.	Work Allotted: Implement safe key retrieval using .get() methods to avoid runtime KeyError crashes.	
Fri, 26/06/2026	Implemented Sets for unique data collection. Handled mathematical set operations (union, intersection) safely.	Work Allotted: Practice deduplication techniques using sets to maintain clean data streams.	
Sat, 27/06/2026	Error session: Solved dictionary key errors and set mutability bugs. Finalized and submitted Week 5 diary.	Corrections Suggested: Fixed unhashable type errors. Faculty Remarks: Verified project execution, safe data handling, and code maintenance. Diary approved.
